Aromatherapy research, June, page 29
Beneficial bacteria found in hot springs, June, page 27
Disease-resistant sunflowers, January, page 32
Earth's resources can support 2 billion people, June, page 28
Evidence of the earliest Americans, March, page 28
Fossil creation research, July, page 24
Fossil found of amphibious whale ancestor, May, page 37
Fossilized blood cells from Tyrannosaurus Rex, February, page 20
Fossils in Ethiopia more than 3 million years old, July, page 18
Light pulses can reset body's internal clock, October, page 25
New mammals discovered in Vietnam forest, October, page 26
Origins of Homo Erectus questioned, June, page 30
Sheep graze with cows for protection, June, page 30
Sunscreens do not prevent melanoma, June, page 30
Vitamin E fed to cattle prevents beef from graying, February, page 20
Worldwide database of genetic information, November, page 32

MATERIALS TECHNOLOGY

Artificial ivory, January, page 29
Carbon-nitrogen compound harder than diamonds, April, page 24
Deodorizing underwear, September, page 28
Fabric-testing mannequins sweat and burn, January, page 30
New, waterproof coating is more efficient, December, page 17
Self-disinfecting ceramic tiles for hospitals, September, page 27

MEDICAL SCIENCES

Firefly gene used to test for tuberculosis, March, page 29
Glaucoma treated with an enzyme, July, page 18
Liposome and laser drug delivery, February, page 21
Magnetic implants aid hearing, November, page 38
Motorized, robotic snakes to be used medically, December, page 17
Non-pulsing heart pump, May, page 41
One egg a day won't raise your cholesterol, October, page 27
Oral birth-control vaccine from salmonella bacteria, September, page 28
Pig disease caused by rare type of virus family, July, page 20
Prescription glasses for the poor cost $1, March, page 26
Synthetic taxol, July, page 18

MISCELLANEOUS

Bearing could help store and regenerate electricity, April, page 27
Coding system smaller and more efficient than bar code, June, page 30
Dante II robot to descend volcano, July, page 26
Electromagnetic gun, November, page 32
Electronic device measures odors, December, page 18

Experiments show evidence of telepathy, October, page 23
Glint-suppressing shield for binoculars, March, page 29
Hot water can kill weeds in citrus groves, November, page 39
Lemelson-MIT $500,000 prize for inventors, May, page 37
Magnetic climbing devices, July, page 18
Measuring methane in cow burps, October, page 24
Mechanical tuna, December, page 17
Neckties have microscopic vitamin prints, January, page 31
New steam engine for micromachines, February, page 24
Omnidirectional wheels for robotic vehicles, November, page 30
Pneumatic muscle to replace hydraulic lifts, April, page 24
Proof of Fermat's theorem, January, page 31
Rinsing chickens to eliminate salmonella bacteria, September, page 28
Scanner measures a person for clothing size, March, page 27
Surprising lack of scientific knowledge in adults, October, page 26
Ten-year-old graduates from college, October, page 24
The world's fastest elevator, May, page 41
Unmanned subs now communicate from undersea, March, page 23

PHYSICAL SCIENCES

A closer look at the San Andreas fault, January, page 31
Computer modeling of Earth's "breathing," May, page 38
Continental drift theory supported botanically, June, page 28
Drilling into volcano to study eruptions, April, page 31
Earthquake-protection system for buildings, May, page 31
Earthquakes may be caused by human factors, November, page 27
Evidence of dark matter, June, page 30
Largest building to be earthquake-proofed, December, page 13
Laser that can be adjusted to desired wavelength, December, page 18
Leaves bend to survive high winds, March, page 24
Liquid lens for cameras and telescopes, May, page 36
Predicting volcanic eruptions, September, page 32
Termination of the Superconducting Super Collider, April, page 23
The January 17, 1994 Los Angeles earthquake, May, page 40
Tool to test nanometer-sized machines, May, page 36
Top Quark found, September, page 32
Tornado studies, November, page 30
Ultralow friction, January, page 32

RUSSIAN SCIENCE

Catalytic deodorizer for shoes, kitty litter, diapers, August, page 20
Ceramic composites retain strength up to 900°C, August, page 22
Highly accurate air-traffic control system for Russia, August, page 20
Nuclear reactors for use in space purchased by U.S., August, page 15
Personal computer sales in Russia, August, page 16
Radar can "see" 99 feet underground from a plane, August, page 23
Radio Shack goes to Russia, August, page 22
Recessed, two-way hinge is invisible once installed, August, page 22
Russian on-line services, August, page 19
Russian rockets used for trips to the moon, August, page 19
Russian technology for tracking tiny space debris, August, page 23
Russian works of art on CD-ROM, August, page 18
Russian-built rover will collect samples on Mars, August, page 20
Russians and Americans trade environmental information, August, page 16
U.S./Russian moon probe, August, page 16

What's New

AUTOMOTIVE

ALTERNATE-ENERGY TECHNOLOGIES

Hotzenblitz compact electric city car, February, page 13
MIT Aztec solar race car, September, page 18
Mitsubishi HSR IV concept car, May, page 14
Salon 2000 hybrid vehicle, April, page 18
Sungo solar race car, September, page 18
Three-wheeled electric motorcycle, September, page 18
Tires designed for alternate-energy vehicles, January, page 26
VW Chico hybrid gas-and-electric car, January, page 20

TRANSPORTATION TECHNOLOGIES

407-foot-long catamaran ferry, January, page 24
BMW chain-driven motorcycle, January, page 11
BMW R1100GS motorcycle, September, page 10
Buell Thunderbolt S2 motorcycle, October, page 16
Charger keeps batteries up in unused vehicles, June, page 24
Concept truck rig reduces drag, September, page 24
Damage-proof bumper and grille, July, page 8
Flat-bed conveyor belt for unloading, July, page 13
Foam-filled tires are flat-resistant, October, page 10
Foam-lined steel safe belts to floor of car trunk, January, page 20
Hydraulic hubless wheel-drive motorcycle, January, page 22
Largest passenger ship ever built, September, page 10
Natural-gas-powered train, September, page 25
Road-hazard warning cone folds flat, April, page 10
Safety barrier at rail crossing, September, page 24
Sunroof has solar-powered fans for cooling car, June, page 12
Suzuki DR Highlander motorcycle, November, page 20
Voice-activated car navigation system, June, page 11

CONCEPT CARS

Aston Martin with prototype Ford V12 engine, September, page 14
BMW E1, February, page 8
Bentley Java, October, page 20
Bertone Karisma, November, page 9
Chrysler Expresso, June, page 14
Fiat Cinquecento hybrid, September, page 25
Ford European Sub-B city car, February, page 10
Ford Profile, May, page 11
Honda ES-21 show motorcycle, June, page 18
Hyundai Accent, July, page 12
Italian motorbike/three-wheeler with BMW engine, July, page 10
Mercedes-Benz SLX, July, page 13
Mercury Premys concept car, June, page 11
Mitsubishi Ecological Science Research vehicle, May, page 24
Opel Scamp, March, page 10
Renault Argos, October, page 16

NEW CAR NEWS

Ace convertible, March, page 16
Avant RS2 station wagon, April, page 21
BMW 316i, July, page 11
Bentley Continental R, February, page 12
Cadillac LSE, April, page 14
Chevrolet Blazer, May, page 18
Chevrolet Lumina and Monte Carlo, April, page 11

Lister Storm with Jaguar V12 600-hp engine, March, page 12
Mercedes-Benz 300E sedan, June, page 12
Mitsubishi 3000GT Spyder, May, page 20
Mustang Cobra Indy pace car, June, page 24
Nissan 240SX, January, page 22
Oldsmobile 88 LSS with on-board navigation, April, page 18
Opel Tigra, February, page 11
Pontiac Sunfire, June, page 16
Porsche 911 Carrera, February, page 14
Rolls-Royce Flying Spur, November, page 16
Saab 900 convertible, June, page 18
Saab 900 hatchback coupe, April, page 16
Suzuki Swift, October, page 9
Toyota GT Convertible Celica, May, page 22
Volkswagen Golf station wagon, March, page 18
Volkswagen Polo, October, page 14
Volvo 850 Turbo, January, page 24

AVIATION AND SPACE

A-12 stealth plane to be displayed in museum, November, page 12
Airbus double-decker plane, October, page 14
Airplane/automobile, March, page 16
Anti-missile laser interceptor, September, page 22
Boeing plane with Airborne Warning and Control Systems, March, page 20
British concept plane for hypersonic space travel, June, page 11
Dual-fuel Russian rocket, November, page 20
First Japanese large-capacity rocket, June, page 24
Foam that stops runaway planes, February, page 14
Formula One airplane, July, page 8
Half-inch thin mirror for laser space defense, June, page 18
Helicopter with two intermeshing rotors, June, page 22
Helmet-mounted display for helicopter pilots, October, page 8
Hubble spots new planets, October, page 14
In-flight weather system for pilots, April, page 14
Lighter and stronger airships, March, page 12
Low-cost fighter could be easily modified, May, page 17
Mars rover, July, page 9
Modified F-16 aircraft, November, page 8
Super-size cargo plane, February, page 12
Wind tunnel simulates flight in freezing rain, November, page 16
Wing increases missile manoeuverability, November, page 8

BICYCLES

All-terrain bike made of aerospace components, February, page 10
Automatic-transmission bicycle, January, page 16
Bicycle designed for Olympics, October, page 9
Bicycle helmet with blinking light strip, October, page 10
Bicycle trailer with one or two seats, March, page 11
Bike with super suspension system, May, page 22
Boomerang-shaped bike frame, November, page 8
Electric bicycle motor, February, page 8
Extreme-terrain bike for sand and snow, April, page 21
Light, fully suspended mountain bike, November, page 22
Linking system for bicycles, September, page 14
Padlock with credit card-sized key, January, page 10
Power assist system for bicycles, April, page 20
Reinforced bike lock, March, page 16
Saw-resistant bike lock, March, page 18
Semi-recumbent with front and rear suspension, January, page 18
Shock resistant city bicycle, July, page 10
Tandem bicycle with foldable frame, July, page 12
The aerospace bike, May, page 10
Two-wheel drive retrofit kits for mountain bikes, October, page 16

COMPUTERS

DESKTOP, NOTEBOOKS, AND TECHNOLOGIES

Apple Macintosh TV, February, page 9
Apple Power Macintosh 8100/80, April, page 11
Apple PowerBook 540, September, page 25
Computer acts as radio, VCR, answering machine, September, page 11
Dell Latitude XP notebook computers, November, page 22
IBM Thinkpad 750C, January, page 11
Macintosh Performa 550, January, page 22
Northgate P100-ES computer, July, page 10
Notebook with slot for interchangeable peripherals, January, page 20
Portable computer with built-in videoconferencing, March, page 20
Power portable need slug, June, page 10
Sega Pico computer for kids, February, page 16
Toshiba Portege T3400CT subnotebook with color, February, page 11

SOFTWARE AND PERIPHERALS

3-D anatomy program, June, page 16
Battery-powered color-capable printers, February, page 13
Beginner sketching software, July, page 11
Bose Acoustimass-3 multimedia speakers for PCs, April, page 18
Business-card-size computer components, June, page 22
CD-ROM simulated auction, April, page 14
CD-ROM upgrade kit also plays audio CDs, March, page 20
CD-ROM-based puzzles, January, page 16
Creative Writer and Fine Artist software for kids, February, page 13
Dennis Miller comedy on CD-ROM, May, page 17
Digital sound and video overhead projector, February, page 10
Digitizing pad converts handwriting to text, March, page 11
Digitizing pad for your PC, February, page 17
Energy-conserving surge protector, January, page 14
Ergonomic keyboard, October, page 9
High-capacity CD card, July, page 13
Inexpensive 3-D modeling software, March, page 18
LapLink wireless file transfer, January, page 14
Low-cost plain-paper fax, copier, and printer combo, November, page 8
Money-management program for Windows, June, page 11
Monty Python CD-ROM for Windows, September, page 22
Multimedia box for videoconferencing, January, page 18
Multimedia encyclopedia of science and technology, September, page 25
Pager card in PCMCIA format, February, page 12
Pager plugs into PCMCIA slot for e-mail, April, page 14
Pen-input tablet for artists, November, page 16
Pen-size laser pointing device, January, page 16
Portable printer/scanner makes bumper stickers, January, page 18
Space shuttle simulation software, November, page 9
Spreadsheet software program for children, September, page 24
SyQuest cards for PCMCIA slots, March, page 11
Timex watch downloads to PDAs, October, page 14
Video phone calls through computer network, February, page 17
Windows desktop customizer, February, page 9
Wireless 3-D mouse is worn like a ring, October, page 10

ELECTRONICS

AUDIO

100-disc CD changer loads from the front, June, page 14

Acoustic piano with headphones, May, page 20
All-in-one assistive listening device, May, page 24
Audio cassettes made of recyclable parts, May, page 14
CD-size spotlight fits in CD storage units, March, page 12
Credit card-sized personal stereo, February, page 8
Digital recorder stores up to one hour of sound, June, page 11
Electronic guitar with piano keys, February, page 8
Electronic keyboard for kids, April, page 21
Headphones mimic theater sound, October, page 20
Hi-fi system with LCD display, February, page 14
Miniature musical accompaniment, May, page 11
Panasonic video CD player SC-VC 10, July, page 13
Portable MiniDisc player with LCD display, February, page 14
Rabbit-ear speakers, September, page 14
Rolodex for CDs, May, page 14
Snail-shaped hi-fi loudspeaker, September, page 18
Super-thin MiniDisc player, May, page 18
Wall-mounting stereo system, September, page 10
Wireless audio receiver for television signals, November, page 16
Wooden sculpted speakers, January, page 11

COMMUNICATIONS

Air/Sea GPS, May, page 20
Cellular phone with built-in answering machine, October, page 8
Cordless phone in a watch, October, page 16
Cordless phone with caller ID, April, page 10
Digital answering machine with cordless phone, March, page 10
Digital phone receives voice or data, June, page 16
Facsimile answering machine with cordless phone, September, page 22
GPS receiver, June, page 14
Handheld CB radio, April, page 20
Jack enables cellular phones to work with landlines, November, page 22
Motorola pager, May, page 10
Orbcomm satellite launched, January, page 20
Pager uses just one AAA battery, January, page 24
Phone stores up to 100 names and numbers, November, page 20
Phone transmits still images, September, page 24
Private pager system, November, page 20
Sony miniature cellular phone, September, page 10
Xband conference calling for video games, November, page 16

MISCELLANEOUS

Binoculars weigh 8 oz. and measure 4 by 3 inches, May, page 18
Four-pound portable copier, March, page 16
Pocket-size night-vision scope, March, page 11
Portable fingerprint recorder and mug shot camera, January, page 26
Rayovac Renewal alkaline batteries, January, page 26
Sharp EL-E300 fraction and equation calculator, July, page 8
Vest that vibrates with music for video games, April, page 16

VIDEO

3-D glasses for special movies use LCD screens, June, page 24
A VCR for HDTV, January, page 26
Amiga video game uses optical discs, February, page 9
Amplified indoor antenna has spiral element, February, page 13
CD-I accessories, January, page 14
Camcorder battery recharger, March, page 18
Camcorder battery with plug for self-charging, May, page 11
Camcorder with image-stabilization technology, February, page 13
Camcorder with special-effects ability, September, page 22
Color video printer, January, page 16
Device projects photos, slides, negatives on TV, February, page 11
Digital entertainment terminal, May, page 22
Digital video mixer has 200 special effects, May, page 24
Flight simulator joystick, October, page 8
Full-body virtual reality suit, January, page 20
Genesis-ready CD player, May, page 18
Joystick for Sega or Nintendo, January, page 16
LCDs with double the vertical viewing angle, February, page 12
Portable 16-bit CD-ROM game system from Sega, April, page 10
RCA Digital Satellite System, April, page 18
Remote control that you customize, April, page 11
Sanyo 40-inch rear-projection 3-D television, June, page 16
Sega upgrade brings games up to 32 bit from 16 bit, October, page 20
Sharp ViewCam Teleport Video Modem, October, page 17
Special-effects video editor for the home, January, page 24
TV, VCR, radio, CD, and cassette in one, July, page 12
VCR bag with detachable battery pouch, May, page 29
Video camera with motorized pan/tilt mechanism, April, page 21
Video game jukebox, May, page 20
Video laser-disc player stores disc to play later, March, page 10
Video message recorder, October, page 20
Virtual reality head-mounted system, July, page 9
Virtual reality underwater theme park in Virginia, June, page 14
Wireless CCTV system for the home, June, page 22

PDAS

Cellular phone, pager, keys, and credit card in one, March, page 20
Handheld organizer, February, page 8
Hewlett-Packard HP 200LX, November, page 9
Pager for digital books, May, page 17
Planner responds to voice commands, February, page 11
Pocket-size voice-recognition organizer, January, page 10
Portable 9600 acoustic coupler for faxes, April, page 16
Sharp Personal Information Assistant, January, page 18
Toshiba Dynapad pen tablet T200CS, July, page 17

HOME PRODUCTS

Chipper/vac with adjustable suction settings, November, page 12
Clamp-on electrical box, November, page 22
Electric mower mulches or discharges clippings, May, page 17
Faucet with durable ceramic disc valve, July, page 11
Flashlight on bendable staff, October, page 18
Fluorescent bulbs with small ballast, May, page 10
Greenhouse film decreases temperatures, May, page 24
Hopper for mowers spreads fertilizer, May, page 22
Hydroponic growing system for the home, May, page 11
Lawn mower with free-floating magnetic blade, June, page 16
Light bulb with computer chip dims in any lamp, February, page 16
Light switch uses optical fibers and flat switches, February, page 17
Open air concept refrigerator, May, page 11
Power windows for homes, June, page 14
Safe night light for children, January, page 11
Sixteen-pound generator, October, page 18
Skylight converts to balcony, May, page 29
Thermostat stays within 1 degree of set temperature, July, page 11
Three-filter drain replaces slow U-shaped trap, September, page 11
Weed-eater vacuum picks up dust to cans, June, page 12
Whirlpool tub with glass-enclosed shower tower, June, page 24

Antipollution mask with replaceable filter, July, page 13
Armored fire fighter, June, page 22
Artificial, concrete reef shaped like a ball, July, page 17
Artistic columns support highway overpass, September, page 18
Building with tallest bank of suspended escalators, June, page 18
Field scope doubles as telephoto lens, September, page 11
Flexible toy set, January, page 10
Hot or cold massage, April, page 10
Instruments made from used car parts, October, page 20
Life-size reproduction of prehistoric shark jaws, May, page 17
Luxury submarine, April, page 20
Paper strip test for PCBs, May, page 24
Pen with semisoft rubber grip, February, page 14
Pollution-fighting pump nozzle, July, page 12
Portable gas stations for seasonal vacation routes, January, page 22
Portable pressurization chamber for divers, September, page 22
Robot gives tours of Hong Kong University, October, page 18
Robots inspect bridge supports in dangerous water, April, page 21
Rubber mat warms plant soil for germination, June, page 22
Safety hood protects against fumes, February, page 10
Shrink-wrapping luggage for security, October, page 17
Single-use disposable contact lenses, May, page 29
Snap-together computer furniture, June, page 18
Solar-powered electric boat, November, page 12
Untippable luggage, February, page 16

PHOTOGRAPHY

Canon EOS-1, November, page 20
Digital camera delivers high-resolution pictures, November, page 8
Leica Mini Zoom super-small camera, April, page 14
Minolta Freedom Zoom 105EX, January, page 22
Olympus IS-10, October, page 9
Pentax IQZoom, October, page 17
See-through camera, May, page 22
Solar-powered camera, November, page 12
Titanium camera with 28-56mm zoom lens, January, page 14

RECREATION

Anchor line stretches from 10 to 50 feet, May, page 29
Baseball bat with aerodynamic dimples, July, page 11
Binoculars compensate for vibrations, March, page 12
Binoculars with infrared filter for night vision, October, page 10
Boat with glass bottom, July, page 10
Catamaran-style windsurfer for beginners, June, page 12
Collapsible camp stove, July, page 8
Downhill skiing simulator, March, page 18
Exercise machine with six workouts, February, page 12
In-line skates with new brake and rockering system, May, page 20
Instapump Fury sneaker, April, page 16
Insulated gloves with detachable mitten cover, April, page 10
Motorcycle helmet with noise cancellation, April, page 11
Stationary surfing system for rivers, May, page 10
Sunglasses with interchangeable lenses, March, page 10
Super-tough duffel bag, June, page 10
Ten-pocket pool table, February, page 11
Titanium softball bat, March, page 10
Trimaran hydrofoil racer has two sails, October, page 8
Two-handled catching and tossing game, February, page 16
Underwater computer transmits by acoustic modem, July, page 10
Waterproof, shockproof marine binoculars, January, page 11
Wind-surfing sail with two-wheeled scooter, July, page 17
World's largest indoor ski resort, November, page 9

RUSSIAN TECHNOLOGIES

3-D voyage on CD-ROM software, August, page 12
Elf gnome minicar, August, page 10
Hands-free night vision goggles, August, page 8
Ice-breaking sea vessel, August, page 8
KGB minicamera, August, page 9
Lada Niva Cossack, January, page 26
Lada Samara Springer, August, page 12
Molniya 100 for civil transport, August, page 9
Monocular with finger loop and mini binocular, August, page 10
Night-vision scope, August, page 9
Russian-designed game software, August, page 8
Soviet nuclear weapon launch clock, August, page 9
Soviet space program on CD-ROM, August, page 10
Submarine built for tours, August, page 12
Thermoplane blimp, August, page 10
Ural Russian motorcycle, May, page 14
Variable-displacement piston engine, August, page 10
Vase made from spy satellite lens, August, page 9
Volga 3105 sedan, August, page 8
Yak 130 twinjet simulates fighter planes, August, page 12

SCIENCE AND TECHNOLOGY

CPR vest, April, page 18
Electronic microscope stores images for display, September, page 11
Emergency oxygen system, April, page 20
Four-leaf clover genetically engineered, July, page 8
Genesis solar telescope observatory, July, page 9
Heat-sensitive robotic pill, January, page 18
Inflatable planetarium, February, page 17
Laser eye surgery for cataracts, October, page 18
Noninvasive glucose sensor for diabetics, June, page 10
Robot for underwater inspection of nuclear plants, June, page 10
Roller prevents seaweed from growing under docks, March, page 11
Toilet monitors diabetics' glucose levels, March, page 20

TOOLS

Benchtop two-speed band saw, February, page 17
Bow wrench aligns warped boards, April, page 20
Circular saw weighs just 10 3/4 pounds, June, page 12
Claw-shaped garden tool for aerating soil, February, page 16
Corner/detail sander, February, page 10
Easy-to-open spring clamps, February, page 9
Electronic level, September, page 24
Ergonomically designed staple gun, January, page 10
Heavy-duty pruner boosts cutting power 70 percent, November, page 22
Inverted pin router for woodworking, September, page 25
Panasonic offset drill/driver, September, page 11
Quick-change blade for scroll saw snaps into place, May, page 18
Ratchet wrench needs 5-degree arc to turn, October, page 16
Ratchet wrenches with more torque, April, page 16
Recycling lawn mower cuts long grass and mulches, October, page 18
Resin-jacketed steel hammer, May, page 14
Sander that rotates at constant speed, July, page 12
Sliding miter table extensions for the home, January, page 24
Stihl chain saw has digital display, October, page 14
Tape measure uses laser beam, October, page 9
Triangular-head hammer, March, page 12
